The following is an Examiner's Statement of Reasons for Allowance: Applicants' arguments, dated 4/23/2007, have been carefully considered and have been found convincing. The Prior Art is replete with methods and/or apparatuses, which determine an error condition and then determine whether the error condition is an open circuit, short circuit condition to ground or a short circuit condition to power supply, as evidenced by Schmitt et al. (6,226,602). References found in the Prior Art determine some or all of the above conditions, each in its own manner, but there does not appear to be strong motivation for modifying or combining their teachings so as to obtain the instant invention. The Independent Claims 1 and 11 each require a first diagnosis phase/means for determining a normal or error condition and a second diagnosis phase/means for determining whether the error condition is an open circuit, short circuit condition to ground or a short circuit condition to power supply and each further requires that during the second diagnosis phase/means, a first parameter associated with the load is changed in an attempt to escape from the error condition. This cannot be interpreted as merely providing condition indication or interrupting the circuit operation. Therefore, it is the opinion of the Examiner that the Instant Claims 1-19 are novel and unobvious in view of the Prior Art of Record.

Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ronald W. Leja whose telephone number is (571)272-2053. The examiner can normally be reached on Monday thru Friday.
